Mr. Stanley Spruiell

Dear Mr. Spruiell,

The Texas Commission on Environmental Quality (TCEQ) is broken. I applaud EPA's proposed ruling that major portions of the TCEQ air permitting process does not adhere to the Clean Air Act, and should be thrown out.

That was a good first step. Now is the time for the EPA to take bold action by:

- Halting any new air pollution permits from being issued by TCEQ utilizing TCEQ's current illegal policy
- Creating a moratorium on the operations of any new coal-fired power plants in Texas until the TCEQ cleans up its act by operating under the Federal Clean Air Act standards
- Requiring coal companies clean up their old, dirty plants -- no exemptions, no bailouts, and no special treatment by reviewing all permits issued since the TCEQ adopted its illegal policies and requiring that these entities resubmit their applications in accordance with the Federal Clean Air Act.
- Put stronger rules in place in order to reduce global-warming emissions and to make sure new laws and rules do not allow existing coal plants to continue polluting with global-warming emissions.

I have lived in Texas my entire adult life. All that time I have read reports about cancer rates in my gulf coast area, and the uphill struggles to get Texas to recognize Clean Air standards and their

importance. We are forced to survive amid the effects of oil, chemical, auto and coal industries on our air.

Texans deserve better. We cannot let coal stand in the way of our

clean energy future in Texas--the EPA must put strong rules in place to

make sure the coal industry is held responsible for their mess and that no permits issued under TCEQ's illegal permitting process are allowed to proceed forward.

Strong regulations are vital to cleaning up the energy industry and putting us on a path to clean energy technology that boosts economic growth, creates jobs in Texas and protects our air quality, health and communities.

Sincerely,

Mr. Hank & Karen Kastner
