Subject It's time to enforce the Clean Air Act in Texas

Message Body

Oct 15, 2009

Ms. Lisa Perez Jackson
Ariel Rios Federal Building, Room 3000
1200 Pennsylvania Avenue, NW
Washington, DC 20460-0001

Dear Ms. Perez Jackson,

The Texas Commission on Environmental Quality (TCEQ) is broken. I applaud EPA's proposed ruling that major portions of the TCEQ air permitting process does not adhere to the Clean Air Act, and should be thrown out.

That was a good first step. Now is the time for the EPA to take bold action by:

- Halting any new air pollution permits from being issued by TCEQ utilizing TCEQ's current illegal policy
- Creating a moratorium on the operations of any new coal fired power plants in Texas until the TCEQ cleans up its act by operating under the Federal Clean Air Act standards
- Requiring coal companies clean up their old, dirty plants -- no exemptions, no bailouts, and no special treatment by reviewing all permits issued since the TCEQ adopted its illegal policies and requiring that these entities resubmit their applications in accordance with the Federal Clean Air Act.
- Put stronger rules in place in order to reduce global warming emissions and to make sure new laws and rules do not allow existing coal plants to pollute old global warming emissions.

Texas has more proposed coal and pet coke fired power plants than any

other state in the nation, is #1 in carbon emissions, and is on the top of the list for the largest increase in emissions over the past five

years. My city, Corpus Christi, has a proposed petroleum coke plant in the works that will increase emissions in our city by 70%, even though

we already have more refineries in a populated area than any other city in the United States, except for Los Angeles. Corpus Christi-ans and Texans deserve better. We cannot let coal or petroleum coke stand in the way of our clean energy future in Texas--the EPA must put strong rules in place to make sure the coal industry is held responsible for their mess and that no permits issued under TCEQ's illegal permitting process are allowed to proceed forward. Strong regulations are vital to cleaning up the energy industry and putting us on a path to clean energy technology that boosts economic growth, creates jobs in Texas and protects our air quality, health and communities.

Sincerely,

Mrs. Emilie J. Olivares
4205 Dody St
Corpus Christi, TX 78411-3001
