Mr. Stanley Spruiell

Dear Mr. Spruiell,

The Texas Commission on Environmental Quality (TCEQ) is broken. I applaud EPA's proposed ruling that major portions of the TCEQ air permitting process does not adhere to the Clean Air Act, and should be thrown out.

That was a good first step. Now is the time for the EPA to take bold action by:

- Halting any new air pollution permits from being issued by TCEQ utilizing TCEQ's current illegal policy
- Creating a moratorium on the operations of any new coal fired power plants in Texas until the TCEQ cleans up its act by operating under the Federal Clean Air Act standards
- Requiring coal companies clean up their old, dirty plants -- no exemptions, no bailouts, and no special treatment by reviewing all permits issued since the TCEQ adopted its illegal policies and requiring that these entities resubmit their applications in accordance with the Federal Clean Air Act.
- Put stronger rules in place in order to reduce global warming emissions and to makes sure new laws and rules do not allow existing coal plants to pollute old global warming emissions.

Texas is #1 in carbon emissions, and is on the top of the list for the largest increase in emissions over the past five years.

The EPA must put strong rules in place to make sure the coal industry is held responsible for their pollution and that no permits issued under TCEQ's illegal permitting process are allowed to proceed forward.

Strong regulations are vital to cleaning up the energy industry and putting us on a path to clean energy technology.

Sincerely,

Mr. Pierre Catala
