

YCEJ Database Access Documentation

Database Overview

The YCEJ database contains data related to EPA dockets, regulatory comments, feedback analysis, and summary information. The database integrates multiple data sources including EPA header information, comment data, extracted text from PDFs, and graded feedback.

Connection Information

Database Type: PostgreSQL

Host: localhost (or specific server address)

Port: 5432

Database Name: ycej_database

Username: reader

Password: ycej_guest

This read-only account allows you to query data but not modify the database structure or content.

Using Beekeeper Studio

1. Download and install [Beekeeper Studio](#)
2. Open Beekeeper Studio
3. Click "New Connection"
4. Configure the connection using the info above:
 - Connection Type: PostgreSQL
 - Host: localhost
 - Port: 5432

- User: reader
- Password: ycej_guest
- Default Database: ycej_database
- Name: YCEJ Database (or any name you prefer)

5. Click "Test" to verify the connection works

6. Click "Connect" to access the database

7. Click "Save" for easy bookmarking

Database Schema

The database consists of the following tables and relationships:

Tables

1. summaries

Contains Harvard EELP summaries.

Column	Type	Description
id	INT	Primary key
title	TEXT	Title of the summary
link	TEXT	URL to the source
date	TEXT	Date
federal_register_link	TEXT	Link to FR entry, if available
contains_federal_register	BOOL	Whether it contains a FR reference
document_id	TEXT	Document ID

2. dockets

Contains EPA docket information.

Column	Type	Description
docket_id	TEXT	PK

Column	Type	Description
docket_type	TEXT	Type of docket
last_modified_date	TIMESTAMP	When the docket was last modified
agency_id	TEXT	ID of the responsible agency
title	TEXT	Docket title
object_id	TEXT	internal object identified (?)

3. **comments**

Contains comments submitted to EPA dockets.

Column	Type	Description
comment_id	TEXT	PK
docket_id	TEXT	FK to dockets table
comment_on_document_id	TEXT	Document being commented on
comment_text	TEXT	Comment text
posted_date	TIMESTAMP	When the comment was posted
object_id	TEXT	Internal object identifier (?)
duplicate_comments	INT	Count of duplicate submissions
document_type	TEXT	Type of document
tracking_nbr	TEXT	Tracking number if available
submitter_rep	TEXT	Info about the submitter

4. **feedback**

Contains graded feedback on comments.

Column	Type	Description
id	INT	PK
comment_id	TEXT	FK to comments table

Column	Type	Description
graded_feedback	TEXT	AI graded feedback on the comment

Relationships

- **dockets → comments:** One-to-many (a docket can have many comments)
- **comments → feedback:** One-to-one (a comment can have one feedback entry)
- **summaries → dockets:** Link through document_id = docket_id
